Here you can request rest api

## Creating a Survey

There is form id and form title along with bunch of question which user set and create from
Method Type: Post
https://surveyrestheroku.herokuapp.com/AddSurvey
Format for request

```
{
   "sid": 1,
   "title": "Form 1",
   "Questions" : [{ "qid":1, "Text": "q1 ", "yes" : 0 ,"no" : 0,"total":0},
   { "qid":2, "Text": "q2 ", "yes" : 0 ,"no" : 0,"total":0},
   { "qid":3, "Text": "q3 ", "yes" : 0 ,"no" : 0,"total":0}
   ]
}
```

After Distributing URL of form. Everyone who look it give their opinion

## Taking a Survey

Method Type: Post
https://surveyrestheroku.herokuapp.com/Answers
User1

```
{
  "sid": 1,
  "answers": [
    { "qid":1,  "ans":true},
    {
       "qid":2, "ans":null
    },
        { "qid":3,  "ans":false}
 ]
}
```

Similar way user posts their opinion

## Getting Results of a Survey

Method Type: Get
# https://surveyrestheroku.herokuapp.com/Result/1

It's tell us how many user choose yes or no out of total user per question in form
